

AUGUST 20-21

ICAHN SCHOOL OF MEDICINE
AT MOUNT SINAI

1468 MADISON AVENUE, NYC

INVESTMENT PROSPECTS & ADVANCES IN RESEARCH

On August 20-21, 2020, our third annual conference, Ending Age-Related Diseases: Investment Prospects and Advances in Research, will take place at the Icahn School of Medicine at Mount Sinai in New York City. It is organized by Life Extension Advocacy Foundation/Lifespan.io, a nonprofit that supports scientific research on the mechanisms of aging and fosters the development of rejuvenation biotechnology that can eradicate age-related diseases, thereby offering people the means to live longer, healthier lives.

With numerous interventions against aging already in human clinical trials, the rejuvenation industry seems to be about to bear fruit. The goal of our conference is to promote collaboration between researchers, biotech companies, investors, regulators, and doctors in order to foster the development of next-generation drugs and therapies that directly target the processes of aging and thus have the potential to prevent and cure age-related diseases.

We would be delighted to collaborate with partners that share our desire to free people from the burden of age-related diseases. Here are the sponsorship packages that we are offering.

The package	Bronze (\$2k)	Silver (\$5k)	Gold (\$10k)
Free entrance tickets + conference bag	2 people	3 people	5 people
